Music is the rhythm and harmony that flows from the universe to the individual, the cosmos to the finite. When the heart melts, music dawns, dance happens. Music is an essential part of the flowering of human potential. It brings refinement in our evolution. It is a significant part of spiritual growth. In the space of music, questions disappear, wonderment dawns. Doubts drop, thoughts dissolve and it connects one to the heart. The journey from the head to the heart brings harmony, connectedness and a sense of belongingness - the true essence of life!
